BURIED UNDER FALLING WALLS.

Six Workmen Injured by the Collapse of a Brooklyn Building.

ONE MAN CRUSHED TO DEATH.

Carl Benson Was Hemmed In by Beams and Had to Saw His Way Out.

IT WAS A STORAGE WAREHOUSE.

Partly Destroyed by Fire Some Weeks Ago, It Was Being Repaired.

A portion of Latimer's old storage warehouse, on the north side of Atlantic avenue, near Court street, Brooklyn, collapsed at 2.30 o'clock this afternoon, burying in its ruins a number of men who had been at work making repairs in the building.

One man was killed outright, half a dozen others were pulled out of the debris by the firemen and policemen who had been called to the scene by fire alarms, and several others were for a time imprisoned under the heavy timbers and bricks.

The groans and cries of the imprisoned men were for a time plainly audible to those working to dig them out.

The man who was killed outright was Emil Erickson, of 358 Atlantic avenue. He was a framer by occupation, and had been at work on the fourth floor of the building.

He was hurled to the street and crushed to death against a stone carriage block.

Latimer's building covered the lots 201-203 Atlantic avenue. Six weeks ago it was partially gutted by fire. After a settlement was effected with the insurance companies, work was begun putting the building into repair.

The carpenter work was given to M. Peterson, of 358 Dean street, and Johnson Bros., of 305 Prospect avenue, were engaged to lay a concrete floor in the cellar.

The work was progressing rapidly. To-day there were six concrete layers in the cellar and as many carpenters distributed about the building when the crash came.

The first warning the men had of impending danger was five minutes before the building fell.

Henry Johnson noticed that the party wall in the cellar bulged badly and several bricks fell. He stopped work and began making an examination.

A moment later a half dozen more bricks dropped, and a middle pier crumbled.

"Run for your lives," he shouted, as he saw the bricks continue falling. The men only got a few feet when there was a crash, and the eastern half of the structure collapsed.

Belcher, of the Long Island College Hospital, who was passing, immediately sent in an alarm for the firemen, and several ambulances were called.

of debris weighing several tons on the northeast corner of the building.

The police were called and they began tearing away the rubbish.

Then somebody gave the order to suspend work, and a conversation was begun with the man under the pile.

His replies were very indistinct, and he was understood to say that there were four men imprisoned near him.

Instead of going to work and trying to rescue the men, the police kept up their inquiries for several minutes.

A sergeant from the Adams street station appeared on the scene, and ordered the men to get to work clearing away the debris.

At 4 o'clock the firemen reached the hand of a man named Carl Benson.

Benson called out that he was not badly hurt, and told the firemen that he thought he was the only one in the cellar, as the others had been taken up through the coal-hole.

Benson's life was saved in a most remarkable manner.

The mass of debris covering his body rested upon fallen beams, which protected him from injury.

The beams had lodged upon a pile of bricks in the cellar, just a few inches above his body.

There was a great mass of debris, consisting of bricks, broken beams and furniture, and a portion of the roof, which the firemen had to dig through before Benson could be extricated.

After digging for almost an hour over the spot where Benson lay, the firemen succeeded in cutting a hole through to him.

The man was so closely penned in by beams that the rescuers found it could not extricate him without hurting him.

After a few minutes consultation with the imprisoned man, the firemen, at his suggestion, passed him down a hand saw, and he began to saw his way through the heavy beams.

The firemen meantime removed the wreckage from above the beams so that none of it should fall through and crush him when the beams were cut.

After half an hour's hard work Benson succeeded in cutting through the beams and was lifted out by the firemen.

A superficial examination showed that he had escaped serious injury.

He sustained a number of bruises, however, and it is believed that his back is strained.

REAL WAR IN COLORADO.

Miners Blow Up Two Shafts and Scatter a Force of Armed Deputies.

MANY OFFICERS CAPTURED.

Strikers Strongly Intrenched with Plenty of Powder and Rations.

ILLINOIS TROOPS CALLED OUT.

Attack on the Mining Offices at Centralia—La Salle in Peril.

(By Associated Press.)

CRIPPLE CREEK, Col., May 25.—Mayor Whittington to-day received a telephone message that miners from Bull Hill had surrounded the Independence and Portland mines, and that a battle was in progress.

A wagon load of powder was backed up against the shaft house of the Strong mine by strikers and exploded. Several men were in the shaft-house a short time before. Whether they got out alive or not is not known.

All telephone wires leading into the hills have been cut, and it is feared the telephone wires will go soon.

When the special train bearing 150 armed deputies reached Victor the deputies were immediately surrounded by 400 miners. A pitched battle ensued, in which the deputies took refuge behind the rocks. It is not known whether any were killed.

The deputies finally proceeded to the Independence mine and secured possession. They are being besieged by a part of the miners.

The Anna Lee shaft-house, as well as the Strong, has been blown up.

A mob is now on the way to the Victor and Pharmacal mines with the intention of blowing up the shaft-houses, after which it will proceed to the Summit mine.

Thomas H. Jones, one of the two men beaten by the miners yesterday, died of his injuries to-day. Under Sheriff Brishane is coming from Colorado Springs and will deputize all the available men as a force to fight the strikers.

P. M.—Eighteen or twenty deputies, who were scattered about in the cabins below the Independence Mine, in Wilson Creek, have just surrendered to the strikers. They were told that if they would quietly hand over their rifles and side arms, they would not receive personal injury, and after a conference the deputies gave in.

They are now being marched to this city under a strong guard via the town of Altman. Whether they will reach this city in safety is an open question.

The guards that came up from Denver are now somewhere in the hills east of the Independence mine, while hundreds of miners armed with Winchester rifles are patrolling the roads about the Victor to the west, south and north.

At the summit of Bull Hill, but 600 feet away from the Victor property, the miners have a barracks of logs and broken rock, which is supplied with loopholes and ladders. Considerable ammunition is stored there, and also a quantity of provisions.

TIGHT GAME IN BROOKLYN.

Lots of Muffing and Wild Throwing by Giants and Bridegrooms.

PLAYING LIKE AMATEURS.

Doyle and Kinslow Give Great Exhibitions of How to Let In Runs.

NEW YORK IN FAIR LUCK.

Attack on the Mining Offices at Centralia—La Salle in Peril.

(Special to The Evening World.)

EASTERN PARK, BROOKLYN, May 25.—Eastern Park did not offer much better weather this afternoon than New York did for game yesterday, but the teams were determined to play. The skies were dotted with threatening clouds, the grounds were wet and it was rather chilly. Altogether it was a poor day for the pastime.

The attendance was not large. The teams were thus placed:

New York.
